

FORMULA STUDENT

Update for the coming year:

During the summer, Mateusz Gizicki and Adrian Dancea have been working on disassembling a Yamaha R6 YFZ 2005. The engine detached from the bike is now ready to be installed on the Formula Student racing car.

The design team is comprised of Sam, Ille, Alex and Mateusz. They have consistently worked hard towards the design of the race-car chassis frame and have now finished the major modelling process. The design has been done following the IMechE general design requirements.

Meanwhile, the business team is building up new strategies that will ensure a smooth running of the project.

On top of that, the business team is also concentrating on gaining sponsorship and developing future partnerships.

The business team is divided into 3 parts: Administration, Marketing and Finance. These will be working together to achieve the common goal.

Members of the Formula Student team gave a presentation at the NETP meeting and subsequently have had lots of offers of help from partners. Details of the project and ways to get involved will be kept up to date on the NETP website.

Thank you all.
